

SYSTEM REQUIREMENTS

DARTFISH SUGGESTS MINIMUM AND RECOMMENDED SYSTEM REQUIREMENTS. WHAT ARE THE DIFFERENCES?

A **minimum** system requirement lists the basic software/hardware that is required to run Dartfish Software.

Meeting the **recommended** system requirements will allow you to perform specific tasks and increase your productivity by performing jobs faster. **Recommended requirements** are particularly important if you intend to perform these tasks:

- 👉 Work with HD /4K resolution video
- 👉 Compare multiple clips
- 👉 Convert or encode the video stream from your capture device in real-time
- 👉 Optimize the conversion time when publishing to Dartfish.tv
- 👉 Convert your clips to MPEG-4 H.264 video file format
- 👉 Pre-record a longer amount in InTheAction, as this requires more memory
- 👉 Work with projects with a great number of clips
- 👉 Use high-resolution monitor (≥ than 1920x1080)
- 👉 Use more than one monitor or use a data projector
- 👉 Work with IP or BlackMagic devices
- 👉 Dual camera in InTheAction and Video Replay
- 👉 Timeshifting
- 👉 3D drawings

	RECOMMENDED		MINIMUM
OPERATING SYSTEM	Windows 10, 8.1, 7 SP1 updated		
	DESKTOP	LAPTOP	
PROCESSOR¹	≥ 7 th generation Intel® Core™ i7 ²	≥ 7 th generation Intel® Core™ i7HQ quad core ²	6 th generation Intel® Core™ i5
GRAPHICS	≥ Intel® HD Graphics 610		Intel® HD Graphics 4200
MEMORY	≥ 8 GB of RAM ³		4 GB of RAM
STORAGE			
<ul style="list-style-type: none"> • Software Installation • Recording • Storage / Playback 	256MB ≥ 256GB internal SSD ≥ 1TB internal or external USB3		256MB 256GB internal HDD 1TB internal or external USB3

¹ AMD processors not tested

² with Intel Quick Sync for graphic hardware acceleration

³ ≥1.6 GB of RAM recommended for 4 camera live recording
