

SYSTEM REQUIREMENTS

DARTFISH SUGGESTS MINIMUM AND RECOMMENDED SYSTEM REQUIREMENTS. WHAT ARE THE DIFFERENCES?

A **minimum** system requirement lists the basic software/hardware that is required to run Dartfish Software.

Meeting the **recommended** system requirements will allow you to perform specific tasks and increase your productivity by performing jobs faster. **Recommended requirements** are particularly important if you intend to perform these tasks:

- 👉 Work with HD resolution video
- 👉 Compare multiple clips
- 👉 Convert or encode the video stream from your capture device in real-time
- 👉 Optimize the conversion time when publishing to Dartfish.tv
- 👉 Convert your clips to MPEG-4 H.264 video file format
- 👉 Pre-record a longer amount in InTheAction, as this requires more memory
- 👉 Work with projects with a great number of clips
- 👉 Use high-resolution monitor (≥ than 1920x1080)
- 👉 Use more than one monitor or use a data projector
- 👉 Work with IP, Basler, or BlackMagic devices
- 👉 Dual camera in InTheAction and Video Replay
- 👉 Timeshifting

	RECOMMENDED		MINIMUM
OPERATING SYSTEM	Windows 10, 8.1, 7 SP1 updated		
	DESKTOP	LAPTOP	
PROCESSOR¹	≥ 5 th generation Intel® Core™ i7 ²	≥ 5 th generation Intel® Core™ i7HQ quad core	4 th generation Intel® Core™ i5
GRAPHICS	≥ Intel® HD Graphics 5600		Intel® HD Graphics 4200
MEMORY	≥ 4 GB of RAM		2 GB of RAM
STORAGE			
<ul style="list-style-type: none"> • Software Installation • Recording • Storage / Playback 	256MB	≥ 256GB internal SSD	256MB 256GB internal HDD 1TB internal or external USB3
	≥ 1TB internal or external USB3		

¹ AMD processors not tested

² we do not recommend Intel high end desktop processor as they don't support hardware acceleration video encoding
